AIDS Videoconference a First for Extension

Thalk up a "first" for the Faculty of Extension with the videoconference on AIDS that will be part of a conference on this important topic on 28 September.

As one component of the conference, the Faculty will be using satellite broadcast technology to bring continuing professional education content into Edmonton from Sheridan College in Ontario.

Using satellite transmission of content (video) from a conference simultaneously being held at another location has been successfully applied in the United States and Europe for four or five years. But it is a relatively new tool in Canada, particularly in Western Canada. In Edmonton, NAIT has been bringing business and technical conference material in for about nine months.

Dennis Foth, Dean, Faculty of Extension (conference co-sponsors with University of Alberta Hospitals), looks forward now to seeing this technology used systematically at our University for educational purposes, particularly for continuing professional lucation. □

Faculty of Extension, University Hospitals Sponsor AIDS Conference for Health Professionals

A one-day conference for health professionals, "Action on AIDS: are health professionals ready?" will be held on Wednesday, 28 September, in the Walter C. Mackenzie Health Sciences Centre (Bernard Snell Hall), 8 a.m. to 4:30 p.m.

The conference, sponsored by the Faculty of Extension and the University of Alberta Hospitals, features a two-hour videoconference joined live via satellite from Toronto.

Medical and educational experts will discuss topics ranging from attitudes and behavior in response to AIDS, to the latest medical information on AIDS and the HIV infection. As part of the videoconference, local experts will

address the concerns of health care professionals about AIDS.

The conference has been approved for six hours of recommended study credits by the College of Family Physicians of Canada.

Registration is \$100, and this includes a continental breakfast, coffee, luncheon and printed materials

Brochures and registration forms are available through the Faculty of Extension.

For more information, contact Christine van Roodselaar, Faculty of Extension, University of Alberta, Corbett Hall, 82 Avenue and 112 Street, Edmonton, T6G 2G4. Telephone: 432-5070.□

Leisure Researchers to Convene Editorial Meeting on Campus

The first publication devoted to leisure research made its debut in the United States in 1968. Two decades of concerted study have spurred a group of researchers, including the University of Alberta's Tim Burton, Ed Jackson, Guy Swinnerton and Wes Cooper, to produce a book dealing with the most important concepts and topics in leisure recreation and research.

Along with 22 other researchers from Canada, the United States, Britain and Australia, they are contributing to a 25-chapter book – Leisure, Recreation and the Social Sciences – that will be published by Venture Publishing in 1989. (The firm, whose offices are at State College in Pennsylvania, is the major publisher in the field, says Dr. Jackson.)

Funding for the editorial session comes from the Social Sciences and Humanities Research Council of Canada, the University of Alberta Conference Fund, Alberta Recreation and Parks and the publisher.

Half of the book's authors will gather here on 25 August and spend five days going through the book page by page (two drafts of each chapter have been written) in preparation for its publication. Another day (29 August) will see the nine visiting researchers give presentations to Alberta Recreation

and Parks. Among the topics that are designed to help officials develop new policy for the province are: "Environmental Impact of Leisure and Recreation," "Leisure and Professionalism," "Barriers to Leisure Participation," "Recreation Resource Management," and "Leisure and Unemployment."

The disciplines in which the contributors earned their PhD degrees are: political science, geography, recreation and leisure studies, psychology, economics, sociology, philosophy and planning.

Machine Shop Craftsmen Fashion Safeguard for University's Computers

In days of yore, thieves ran the risk of feeling cold, hard steel.
Contemporary thieves eyeing
University of Alberta computers
will find that although the metal
can't contribute to their demise, it
can put a dent in their plans.

A number of computers have been bolted to desks. When the working day ends, a stainless steel jacket (weight: two kilograms) is slipped over the hardware and two padlocks are snapped on. The device, made by Richard Wodzich and his co-worker, Murph Korth, is, well, catching on. The two Machine Shop employees have filled an order for 20 safeguards for University Computing Systems' Sun Lab and are working on orders for new computing labs in Faculté Saint-Jean, the Faculty of Law and the Department of Music.

The University owns 4,450 microcomputers. Two years ago, computer theft reached a high of \$100,000 per year. Campus Security apprehended two individuals and also had the Machine Shop make up two heat stamps, reasoning that a large "U of A" burned into computers would make it difficult for thieves to sell them.

"There was a real rash at one time but it seems that major thefts have stopped," says Ralph Oliver (Campus Security). In the past year, two complete computers plus assorted accoutrements (total value: \$15,565) were stolen.

The University used to order lock-down devices from a company in Toronto but there was a change of suppliers and orders weren't being filled promptly. University Computing Systems, which submitted the orders, elected to go exclusively with the Machine Shop product, says Bruno Berto, electronics technician. (Mr. Wodzich will accept individual orders but it's less costly to order a batch of the devices; one model sells for \$170, another, also made of stainless steel, for \$113.)

Mr. Wodzich says it takes him about three hours to manufacture each safeguard. The main aspects of the work are welding, pressing and drilling holes.

The custom-made fabrication can be applied to virtually any model of computer found on campus, and Mr. Wodzich is willing to visit offices, labs and workstations and talk about the securing of computers. He knows his stuff, having been in the metal fabrication business since 1950 when he began his apprenticeship in Hamburg, Germany.

Besides the computer security devices, the Machine Shop (a division of Technical Services) produces a raft of necessities, including map carts, book trucks, guinea pig cages and campus mail boxes.

Richard Wodzich claps a computer in steel. The Machine Shop is in the basement of the Chemical/Mineral Engineering Building.

National Body Cites Daniel Smith for Environmental Engineering Efforts

Daniel Smith (Civil Engineering) is the recipient of the first Albert E. Barry Medal for outstanding contributions to environmental engineering.

Dr. Smith accepted the medal at the National Environmental Engineering Conference held in Vancouver in mid-July.

The medal is the pre-eminent award of the Environmental Engineering Division of the Canadian Society for Civil Engineering.

An established academic with a number of publications to his credit, Dr. Smith has served as a special consultant in the areas of wastewater management and cold regions engineering for the City of Yellowknife, Department of Public Works, TekTran International, FMS (MacLaren) Engineers, the Environmental Protection Service of Environment Canada, and the U.S. Army, among others.

Daniel Smith

He is a registered professional engineer in Alberta, the Northwest Territories and the States of California and Alaska.

Dr. Berry, for whom the medal is named and who died nearly four years ago at age 90, was regarded as the father of water resources engineering in Canada.

CAUT Remembers Gordin Kaplan as a 'Rare Academic'

The following tribute to the University of Alberta's first Vice-President (Research), Gordin Kaplan, was forwarded to President Myer Horowitz by the Canadian Association of Iniversity Teachers (CAUT).

The Executive of the Canadian Association of University Teachers heard at its July meeting of the death of Professor Gordin Kaplan. We were all profoundly saddened by this news. Some of us knew Gordin personally. Others only by reputation. But we all did know that he was that rare academic who could combine high intellectual achievement with commitment and moral mission. CAUT, in particular, remains indebted to Gordin for his work as president of our association and his unwavering support thereafter. Gordin was one of a group within our organization which brought CAUT to understand that it must defend the rights of the untenured and the young as well as those already established in the profession. It fell to him and his associates at CAUT to implement the 1967 declaration of CAUT which insisted that the untenured had a right to fair and reasonable tenure procedures and to protection from unjustified dismissal. Implementing those

eas produced convulsions both in ertain universities and within CAUT. Gordin was more than equal to the task of leading us through those problems without losing our way. We owe him a lot for it. How quickly academics

forget that it was just yesterday that CAUT, through individuals of the stature of Gordin, led the movement to ensure that such matters as tenure, dismissal for just cause, and the like would be a matter of legal right established by contract and not simply a matter of employer good will.

Gordin was also committed to the view that Canada should be in the forefront of scientific research. It was thus only fitting that the University of Alberta should have had a conference in his honour on this subject last spring. CAUT was pleased to participate through the presence of our then president, Professor John Evans, and our executive secretary, Professor Donald Savage. The conference was a great success. However, it was typical of Gordin, that he was not content to have everyone come to Edmonton to talk about research policy. He wanted some action as

well. As a consequence, a series of resolutions were adopted which CAUT has urged both the Prime Minister and the Minister of State for Science and Technology to implement. CAUT hopes that this will happen as soon an possible.

We shall all miss Gordin - his commitment, his laughter, his drive, but above all his zeal for the ideal university, one that could never be reached but one that was worth fighting for.□

Papers Chase in Alberta Proves Intriguing

Quick now: How many newspapers have been born in Alberta in the past hundred years?

When Gloria Strathern began her University of Alberta research some six years ago she estimated fewer than 500 based on what was listed in libraries and archives.

In fact, there have been more than a thousand, says Professor Strathern, compiler of a new historical directory, *Alberta Newspapers* 1880-1982, about to be released by the University of Alberta Press.

"It came as a surprise to realize so many had been published . . . considering how sparsely populated Alberta was in the early years," she says.

Complicated ownership changes made assembling the directory a tough task. For instance, the *Calgary Albertan* (now the *Calgary Sun*) has changed its name half a dozen times in its career. So "count each title, and you get a lot more than a thousand-plus," says the library science professor.

Defining a newspaper in Alberta presented her with some tricky problems too. Some early publications came out at irregular intervals. Some were hand-printed, single copies, pinned up in a prominent place in their respective communities.

Early weekly papers were often a

sideline for jobbing printers, some of whom found it an exhausting task, to perform alone. One man ran his press by dog-power. Another used a mule "until it became too smart and he replaced it with a steam engine."

The railroad gave birth to the larger, regularly-scheduled papers we know today. "The train brought the boilerplate (ready-made, generic news material) from Winnipeg," she explains. "Before that, there wasn't all that much news."*

* Reprinted from Q and A, published by the University's Office of Public Affairs.

Folio

Display Advertising

Folio is the official news publication of the University of Alberta, published every Thursday throughout the year (except for July and August when it appears biweekly). It has a regular distribution of 9,000 of which 7,800 copies are circulated to teaching and support staff, to graduate students and to other interested people on campus. The remaining copies are sent to provincial and municipal government personnel, news outlets, and businesses and people offcampus.

Sizes and rates

The basic unit size is 27 agate lines x 23 picas (3 7/8" x 2"). The full page is divided into 10 such units, any combination of which is available at a cost of \$35 per unit (minimum 1 unit). Half page cost: \$175. One column cost \$87.50. There is a 15% discount for University departments. A 10% discount is offered for five or more consecutive insertions.

Other specifications

Half-tones (100-line screen or less) are acceptable; no color or bleeds. Cameraready copy is necessary; there is a charge of 30c per word for typesetting, and \$7.50 for adjustment of design work.

Deadlines

Deadline for submission is 3 p.m. one week in advance of desired publication date. Acceptance of advertisements and positioning are at the discretion of the Editor. For more information, telephone (403) 432-2325 and ask about Folio display advertising, or write to: Folio Display Advertising Office of Public Affairs 423 Athabasca Hall University of Alberta Edmonton, Alberta T6G 2E8

Russell F. Taylor, 1920 - 1988

Russell F. Taylor, who passed away on 7 August 1988, was a valued member of the Department of Medicine of the University of Alberta and the University of Alberta Hospitals for more than 22 years.

Dr. Taylor was born in 1920 and took his schooling in Alberta before serving as a navigator for the RCAF from 1941-45. He then entered McGill University from where he obtained his BSc (Honors) in Biochemistry and his degree in Medicine in 1950. He practiced general medicine in Devon, Alberta, until 1953 when he moved to the Allin Clinic in Edmonton, Almost immediately, he took a leave from the Clinic to be the director of the polio program at the Royal Alexandra Hospital during the polio epidemic of 1953-54. Thereafter, he returned to the Allin Clinic where he remained until 1962.

Internal medicine training and cardiology training occupied Dr. Taylor from 1962 to 1965. In July of 1965, he joined the University of Alberta Hospitals and the University as an Assistant Professor, was promoted to

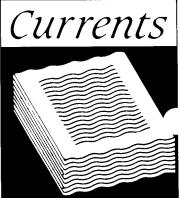

Associate Professor in 1970 and to Professor of Medicine in 1978. He distinguished himself during this time, particularly in his teaching and administrative contributions, though he also published a number of scientific papers and served on a number of scientific bodies. He was a Fellow of the Royal College of Physicians and Surgeons of Canada, the American College of Physicians, the American Heart Association, and the American College of Cardiology. He was heavily involved in teaching medical students and residents and in providing continuing medical education in cardiology to general practitioners in Alberta.

Dr. Taylor established a Resuscitation Team at the University of Alberta Hospitals in 1965 and organized the Coronary Care Program of which he was appointed Director in 1965.

Dr. Taylor's influence on the Faculty of Medicine and the University of Alberta Hospitals was not so much on things as it was on people. A considerable part of his teaching prowess was due to his skills with patients. George Molnar (former Chairman of the

Department of Medicine) has said of him: "Dr. Taylor's exemplary care of his patients, his skill in every aspect of their care, and his devotion to them as their advocate are the elements that make him so well-recognized as a role model for his clinical students."

On 25 February 1988, Dr. Taylor's colleagues honored him with a dinner and a certificate which read in part: "This certificate is presented by the Department of Medicine to Dr. Russell F. Taylor, Professor Emeritus, in appreciation, for his singular contributions to the Department of Medicine from 1965-1988. His teaching has been outstanding, his patient care exemplary and his ability to coordinate people's efforts in achieving goals enviable. He exemplifies the 'educated man' and as such he has benefited everyone with whom he has come in contact."□

Housing Registry Open for Business

The University of Alberta Housing Registry is a free service designed to help students find places to live. If you are a student looking for a home, or a landlord with a place for students to live, telephone the Registry (432-4212) or stop by 143 Students' Union Building.

Change of Time for U of A Video

"In Pursuit of Excellence" will be shown on CFRN TV on 2 September at 6:50 p.m., **not** 7 p.m. as had been announced.

The 18-minute video was produced by Sunwapta Broadcasting Corporation for the University of Alberta.

Extension Courses Brochure

The fall (1988) brochure for Applied Behavioral Sciences courses in the Faculty of Extension is available by calling 432-5069.

Volunteers Wanted

Volunteers are required (men and women, 35 years and above) for 24-h. monitoring of pH in the distal esophagus to establish normal control data. This test carries no risk and imposes little discomfort. Telephone J. Koo at 453-6512. Volunteers will be paid.

Activities

Roger Beck (Business), Bente Roed Cochran (CITL), and Tom Nelson (Psychology) gave a workshop at the 14th international conference on "Improving University Teaching" held at the University of Umeå, Sweden, 20 to 23 June. The workshop was titled "Procedures Followed in Diagnostic Evaluation of Teaching at the University of Alberta" .Tariq Bhatti, an instructor in many areas of the Extension Faculty for a number of years, is moving to Ottawa this month to take up duties with the Canadian Public Health Association as director, Community Health Secretariat . . . G.S.H. Lock (Mechanical Engineering) was elected a Fellow of the American Society of Mechanical Engineers during the 50th anniversary celebration of the Heat Transfer Division in Houston . . . During a recent study period in Europe, Helmut Brauss (Music) presented 22 concerts in Germany and Switzerland ranging from appearances as soloist with orchestras to a joint concert with soprano Kuniko Furuhata on the occasion of the opening of the East Asian Exhibition at the Rietberg Museum in Zurich. The program for Professor Brauss's solo recitals incorporated Malcolm Forsyth's new composition, "Tre Toccate" . . . Abram G. Konrad (Industrial and Vocational Education) presented an invited address on "Measuring Performance of Faculty" at a Crucial Issues Seminar at Coombe Lodge, Blagdon, England, 21 July . . . Botany graduate Scott Daniel Russell has received the prestigious Jeannette Siron Pelton Award for his work in experimental plant morphology, especially his pioneering work on the male gametes of flowering plants. The award was presented at the Botanical Society of America banquet on

17 August at the University of California at Davis

Lederle Cutaneous Research Scholarship Established

Canadian research into malignant melanomas will be intensified by the establishment of the Lederle Cutaneous Research Scholarship at the University of Alberta.

The \$75,000 Lederle

imitment, to span three years, will establish a research residency in the Division of Dermatology and Cutaneous Sciences in the University's Department of Medicine.

Thomas Salopek, a resident at the University of Alberta Hospitals, was presented with the 1988 award at the Canadian Dermatology Association's annual meeting in Banff last month.

The award of \$25,000 annually will be matched by the Advanced Education Endowment and Incentive Fund. Dr. Salopek will spend one full year carrying out research at the University, and will be required to produce at least one scientific paper during the course of training.

"Lederle is committed to increasing basic research spending in Canada," said Paul Wilson, division manager, Lederle Laboratories, Markham, Ontario. "We are proud to be associated with such a fine research institution as the University of Alberta. We are particularly

pleased to support research in two areas of interest to us, dermatology and oncology.

"The Lederle Cutaneous Research Scholarship is a unique opportunity for dermatology training Fellows in Canada," said Kowichi Jimbow, director of the Resident Training Program. "The program will offer a mixture of strong clinical voluntary faculty as well as research-oriented full-time staff. Malignant melanoma has particular attributes that provide opportunities for improved

Dennis Wighton, 1929 - 1988

Dennis Wighton, Administrative Professional Officer in the Department of Genetics, died on 10 August 1988.

Mr. Wighton, who was born in Sussex, England, on 3 August 1929, joined the department in

A funeral service attended by the immediate family was held on 13 August; arrangements are being made for a public memorial service on campus.

A detailed obituary on Mr. Wighton will be printed in Folio next week.

Ball Hawks

The basketball segment of the University's Summer Sports Programs was ending but Mark Kennedy (Westlock), Dan and Josh Payne (Hinton) and Rob Marcotte (Grande Prairie) (left to right) couldn't resist g a few more hoops. Dan Payne,

r of the dunk and bump contests (he was outfitted with Converse clothing), and his fellow sharpshooters will soon complete high school so perhaps we'll next see them in Golden Bears' livery.

Leisure Research

Continued from page one

Dr. Burton, former Chair of the Department of Recreation and Leisure Studies, points out that the University of Alberta was the first Canadian university to offer a degree program in leisure studies, seven years before the discipline gained a discernible profile with the help of the pages of The Journal of Leisure Research.

diagnosis and chemotherapy."

While not appearing in the list of top ten cancers, Canadian incidence and mortality rates of melanoma are rising steadily in both sexes, according to a recent Statistics Canada report.

Positions

The University of Alberta is an equal

opportunity employer.
In accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Academic

Administrative Professional Officer, Department of Genetics

Applications are invited for the position of Administrative Professional Officer, Department of Genetics.
The department has vigorous

undergraduate, graduate and research programs principally involvingmolecular

genetics. The successful candidate will have major responsibilities in budget, personnel administration, management of physical facilities and administration of the teaching program.

Qualified applicants would have, at minimum, a BSc and/or experience in academic or technical administration in a context involving active laboratory research. Starting salary would be in the salary range \$28,796 to \$43,196, according to qualifications and

experience.

Applications, with résumé and names of three referees, should be sent to D. Nash, Chairman, Department of Genetics, University of Alberta, Edmonton, Alberta T6G 2E9. Application deadline: 2 September 1988, or when filled. Starting date: shortly after 2 September 1988.

Administrative Professional Officer, Special Sessions. **Faculty of Extension**

Applications are invited for the position of Administrative Professional Officer in the Special Sessions Office, Faculty of

The APO reports to the Director of Special Sessions and assists in the planning, organization, and administration of the Spring Session, Summer Session and the Off-Campus Credit Program. The position involves extensive liaison with most academic and administrative units within the University as well as frequent contact with students, the public, and representatives of other educational organizations in central and northern

The incumbent is also responsible for providing an efficient administrative support system through the selection, supervision, and evaluation of non-academic staff. Other responsibilities include budget control, Calendar production and promotion of Special Sessions programs.

Applicants must have a University degree and administrative experience in a university setting. (Relevant experience may be considered in lieu of a degree.) Excellent interpersonal skills and the ability to communicate effectively verbally and in writing are required. Experience with OAS, MTS and micro-computer systems would be

Salary will be commensurate with qualifications and experience—the current salary range is \$26,506 to \$39,754 per annum.

The anticipated date of appointment is 3 October 1988.

Applications, including a résumé and the names of three referees, should be sent to: Mr. K.L. Carswell, Director, Special Sessions, Faculty of Extension, 4-107 Education II, University of Alberta, Edmonton, Alberta T0G 2G5

Support Staff

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Due to publication lead time and the fact that positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 19 August. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSR.

Labour Relations Officer. Non-Academic Staff Association

A Labour Relations Officer is required by the University of Alberta Non-Academic Staff Association The Association represents some 3,300 non-academic staff of the University. The Labour Relations Officer reports to the Manager and performs the following functions: handling all aspects of rights grievances,

including preparation for and presentation at adjudication hearings;

- researching and reporting on comparable terms and conditions of employment;

providing consultative services to Association members in the interpretation and administration of the Collective Agreement between the Association and the University, the University personnel policies, the Association policies, and

related statutes; - assisting the Manager in conducting labour relations seminars;

assisting the Manager in the collective bargaining process, including preparation for arbitration hearings; and

- generally assisting the Manager in the daily operation of the Association Office.

The incumbent, with a related degree, must have experience in all or most of the areas listed above, and possess effective communication and conflict resolution skills. The annual salary range is \$31,010 to \$44,232, plus an attractive benefits package. The starting salary will be commensurate with qualifications and experience.

Please apply in confidence, by 26 August 1988, to: Manager, Non-Academic Staff Association, 11033 89 Avenue, Edmonton, Alberta T6G 0Z7.

Faculty of Extension University of Alberta

Take a look through our new Fall calendar

Extension offers you hundreds of opportunities to find out what you'd like to know with workshops, seminars, classes, and services to open the mind's eye.

Remember: Job-related courses are eligible for funding through the Human Resource Development Fund to a maximum of \$500 per fiscal year.

If you're interested in applying for funding for a Faculty of Extension course, a completed HRDF application form should be forwarded to Personnel Services and Staff Relations, 2-40 Assiniboia Hall for approval **prior** to registering.

If you haven't yet received your fall calendar...

Call 432-3116
